VR English Class supported by **kt** **CHUNG DAHM**

EpicLive, SaaS for VR Class

Salin helps Education companies to build up VR Class with EpicLive SaaS. Education companies don't need any Hardware, Network and SoftBank because Salin provides All features to VR class.

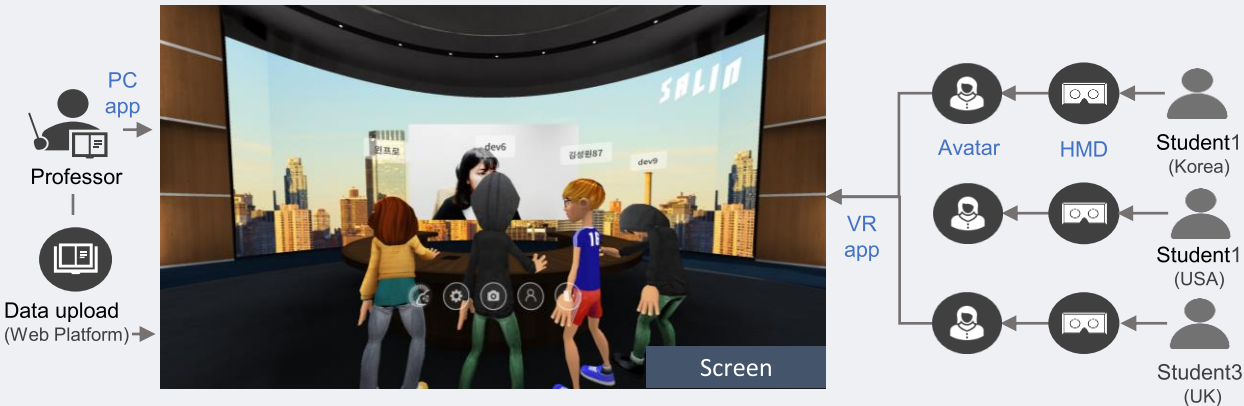

Salin is searching Business partnership for VR class in Asia. Salin could support Asian Education companies because Salin has the technology partnership in Singapore, Japan, China, Spain, Thailand, Australia.

Education and conference in Virtual Reality

- It is a platform for remote/virtual education and corporate education conferences.
- Applies to remote education, teleconferencing, remote team collaboration, and the needs of each company/organization/user.
- Talk in real time in a realistic 360-degree 3D space.

• Students joins VR class via VR Device

University Lectures and Meetings

Salin can be applied in education, meetings, and collaboration using virtual reality functions and upload necessary data such as PPT, PDF, images, and videos with Salin's own web platform. Because it supports cross-platforms, it can be used as various devices without HMD, and it can provide real-time communication by supporting voice calls among users.

• Realistic Virtual Space

• Video/Data sharing and real-time communication
